

## One prompt, two verified answers, two different canonical keys

### A Graph coloring ✓ valid

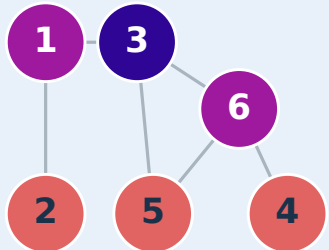

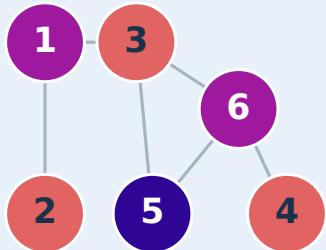

partial colors      

fill vertices 2, 3, 5

1 2 3 5

2 2 3 5

### B Countdown ✓ = 18

tiles {3, 6, 9} · target 18

use each tile once

1 (6 × 9) / 3

`div(mul(6,9),3)`

2 6 + 3 + 9

`add(9,add(3,6))`

### C Python factors ✓ divides

lambda n: Expr

one call per n in 18, 82, 91, 93

1 2 if n%2==0 else  
7 if n%7==0 else 3

`[2, 2, 7, 3]`

2 3 if n%3==0 else  
13 if n%13==0 else 41

`[3, 41, 13, 3]`

### D MathIR ✓ x = 16

solve  $x/2 - 9 = -1$

... · C: add 9 · D: add 1 · E: add 18 · F: ×2

1 C;F

add 9, then ×2  
 $x/2 = 8 \rightarrow x = 16$

2 F;E

×2, then add 18  
 $x - 18 = -2 \rightarrow x = 16$

### E PantryPlan ✓ feasible

2-4 ingredients · 125-200 g

four exact nutrition bounds

1  navel\_orange=75;  
 sunflower\_seeds=50

 + 

2  grape\_tomatoes=75;  
 almonds=50

 +
