Δ B8: additional correct modes

Δ pass@8: probability

E118/E119: replay minus base optimizer. E120: uniform minus frequency replay. B8 = distinct@8 – pass@8.
Complete blocks: unadjusted paired Student-t intervals (E118/E119); exhaustive paired percentile bootstrap (E120).
Partial blocks have no intervals; 0/5 has no estimate. E120 mechanism eligibility is reported separately in the results digest.
