

Hard-MATH online canonical MaxEnt — evidence and live gate

Updated 2026-07-26 23:58:27 EDT

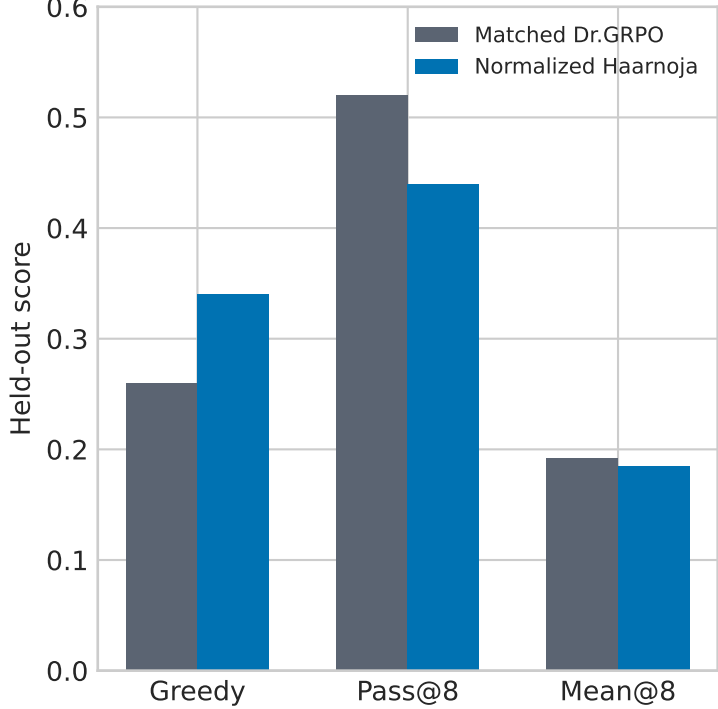

A. Deterministic toy certification

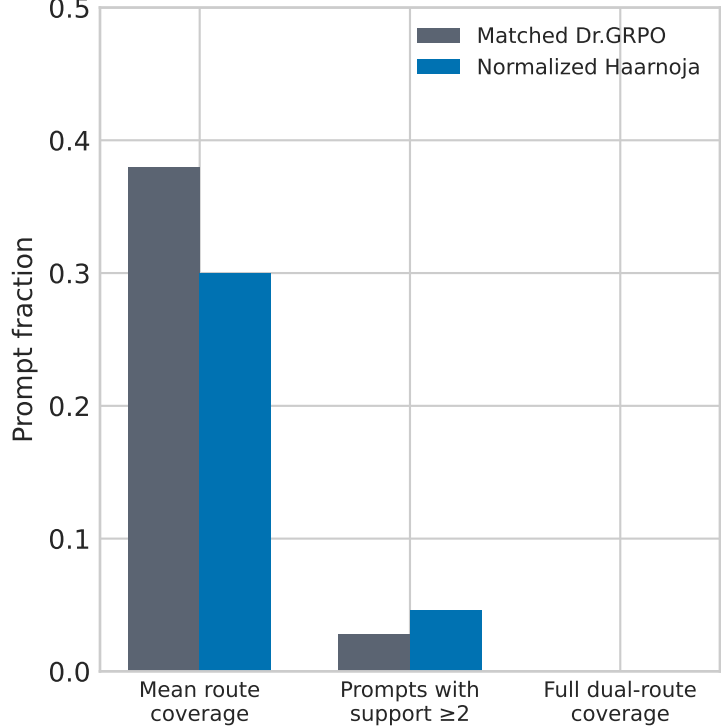

B. Canonicalizer integrity

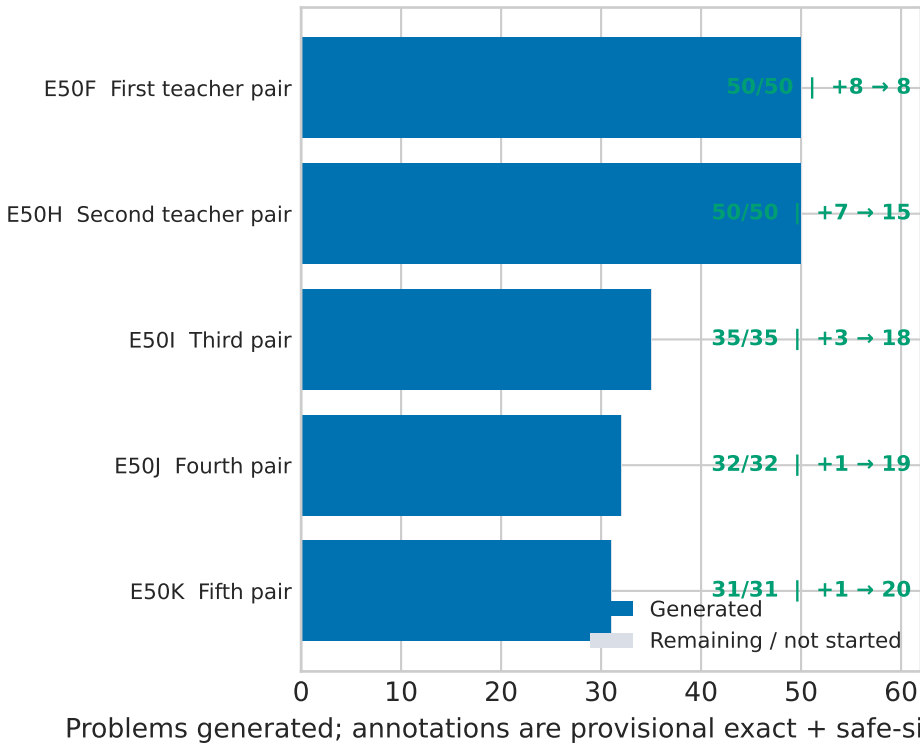

C. First matched toy after 3 epochs

D. Mechanism gate: not yet passed

E. Prospective hard-MATH route bank (live)

F. Current conclusion

What works

- Exact answer validation + finite-menu route binding
- False-new and wrong-declaration vetoes
- Matched 3-epoch training without task collapse

What does not yet work

- E50G: only 3/20 menus survived soundness + signature
- E50G: 0 were bidirectionally executable
- E50D materialization and training remain blocked

Live corpus: 20 provisional dual-route problems; E50G selected 0/10. E50G failed closed; E50D was not materialized.
