

E60 executable Python factors — finite verified bootstrap, then prompt-local canonical replay  
 live status=fail; optimizer step=1920/1920; global bootstrap=64/64; one sentinel seed (not a 3-seed mean)

◆ E60 bootstrap→local (seed 9010 pilot)   
 ● matched Dr.GRPO (seed 9010)   
 - - - - first prompt-local replay update

The x-axis expands with observed training data. Training and adaptation use no gold support, desired mode count, or evaluation feedback; all alpha coefficients are unprojected.
