

One prompt, two verified answers, two different canonical keys

A Graph coloring ✓ valid

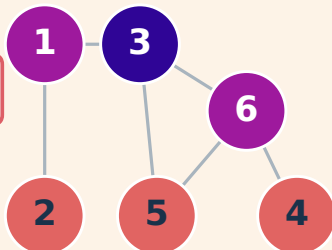

partial colors 

fill vertices 2, 3, 5

1 

2 

B Countdown ✓ = 18

tiles {3, 6, 9} · target 18

use each tile once

1 (6 × 9) / 3

`div(mul(6,9),3)`

2 6 + 3 + 9

`add(9,add(3,6))`

D MathIR ✓ x = 16

solve $x/2 - 9 = -1$

C: add 9 · F: $\times 2$ · E: add 18

1 C;F

add 9, then $\times 2$
 $x/2 = 8 \rightarrow x = 16$

2 F;E

$\times 2$, then add 18
 $x - 18 = -2 \rightarrow x = 16$

C Python factors ✓ divides

lambda n: `EXPR`

one call per n in 18, 82, 91, 93

1 2 if $n\%2==0$ else
7 if $n\%7==0$ else 3

`[2, 2, 7, 3]`

2 3 if $n\%3==0$ else
13 if $n\%13==0$ else 41

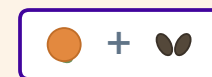

`[3, 41, 13, 3]`

E PantryPlan ✓ feasible

2-4 ingredients · 125-200 g

four exact nutrition bounds

1  navel_orange=75;
 sunflower_seeds=50

2  grape_tomatoes=75;
 almonds=50
