

One prompt, two verified answers, two different canonical keys

A Graph coloring ✓ valid

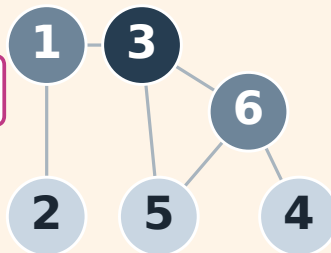

partial colors 

fill vertices 2, 3, 5

1 2 3 5

2 2 3 5

B Countdown ✓ = 18

tiles {3, 6, 9} · target 18

use each tile once

1 (6 × 9) / 3

`div(mul(6,9),3)`

2 6 + 3 + 9

`add(9,add(3,6))`

C Python factors ✓ divides

lambda n: EXPR

one call per n in 18, 82, 91, 93

1 2 if n%2==0 else
7 if n%7==0 else 3

`[2, 2, 7, 3]`

2 3 if n%3==0 else
13 if n%13==0 else 41

`[3, 41, 13, 3]`

D MathIR ✓ x = 16

solve $x/2 - 9 = -1$

C: add 9 · F: ×2 · E: add 18

1 C;F

add 9, then ×2
 $x/2 = 8 \rightarrow x = 16$

2 F;E

×2, then add 18
 $x - 18 = -2 \rightarrow x = 16$

E PantryPlan ✓ feasible

2-4 ingredients · 125-200 g · four exact nutrition bounds
